5	5.6	5-9	The correction process is more complicated for a nursing home OBRA comprehensive or quarterly assessments with any significant errors identified after the end of the 7-day encoding and editing period but before the records has have been accepted into the QIES ASAP system. First, the nursing home must correct the original OBRA comprehensive or quarterly assessment to reflect the resident's actual status as of the ARD for that original assessment and submit the record. Second, to insure an up-to-date view of the resident's status and an appropriate care plan, the nursing home must perform an additional new assessment, either a Significant Change in Status Assessment or Significant Correction to Prior Assessment with a current observation period and ARD. If correction of the error on the MDS revealed that the resident's status met the criteria for a Significant Change in Status Assessment, then a Significant Change in Status assessment is required. If the criteria for a Significant Change in Status Assessment are not met, then a Significant Correction to Prior Assessment is required. See Chapter 2 for details.

5	5.7	5-12	Inactivation Requests An Inactivation should be used when a record has been accepted into the QIES ASAP system but the corresponding event did not occur. For example, a Discharge assessment was submitted for a resident but there was no actual discharge. An Inactivation (Item X0100 A0050 = 3) must be completed when any of the following items are inaccurate: Type of Provider (Item A0200), Type of Assessment (A0310), Entry Date (Item A1600) on an Entry tracking record, Discharge Date (Item A2000) on a Discharge/Death in Facility record, or Assessment Reference Date (A2300) on an OBRA or PPS assessment.
